DETAILED ACTION

The indicated allowability of claims 7 and 11 is withdrawn in view of the newly discovered reference(s) to Keppers et al and Kelley. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keppers et al in view of Kelly. The primary reference discloses in the abstract, col. 3, lines 20-30 and col. 5, lines 5-45 a device for applying a coating such as a wax coating to a floor comprising a mobile unit having a storage container and a spray head. The primary reference fails in anticipation of these claims in that it does not disclose how the storage container is supplied with coating material. The secondary reference discloses a container for supplying wax material to a waxing device. It is the examiner's opinion that it would have been obvious for one having ordinary skill in this art at the time of the time of the invention to supply the container of the coating device with wax coating material from the container of the secondary reference since this is the intended purpose of the secondary reference container.
